

Si bien parece que la guerra civil en Siria finalmente está terminando, es bastante evidente que Washington y el complejo militar-industrial-congresional definitivamente no obtuvieron el resultado que esperaba: la eliminación de Bashar al-Assad y el fin del régimen familiar de Assad.

Mirando hacia atrás y gracias a Google y WikiLeaks, podemos ver hasta qué punto el "Estado Profundo", que incluye al sector de tecnología de Estados Unidos, estaba dispuesto a ayudar a la Administración de Obama y, en particular, a la Secretaria de Estado Hillary Clinton a lograr uno de sus objetivos clave en el Medio Oriente.

Ahora que tenemos una comprensión clara de por qué el levantamiento en Siria fue tan importante (es decir, Israel lo necesitaba para asegurar su primacía nuclear en la región), como se prometió, aquí hay [uno de los correos electrónicos de Hillary Clinton con](#) fecha del 3 de agosto de 2012 que nos muestran claramente cómo Google estaba dispuesto a ayudar a la Secretaria a lograr sus objetivos en Siria:

Hi Hillary,
I'm glad to hear that you're interested in Syria. I've been following the situation there for a while and I think it's important to have a clear understanding of what's going on there. I've been working on a project that I think you might find interesting. It's a project that I think you might find interesting. I've been working on a project that I think you might find interesting. I've been working on a project that I think you might find interesting.

I've been working on a project that I think you might find interesting.

El correo electrónico original fue de Jared Cohen, entonces director de Google Ideas y ahora

CEO de Jigsaw, que ahora se llama Google Ideas. [Aquí](#) está su currículum completo del sitio web del Consejo de Relaciones Exteriores, donde se lo promociona como uno de los grandes "pensadores globales", sea lo que eso sea:

El Sr. Cohen fue uno de los pocos miembros del Personal de Planificación de Políticas de la Secretaria de Estado Condoleezza Rice que se quedó cuando Hillary Clinton asumió el cargo en 2009 bajo la administración de Obama. Abandonó este cargo el 2 de septiembre de 2010, asumiendo un cargo en el Consejo de Relaciones Exteriores y también fue contratado como el primer director de [Google Ideas \(también conocido como Jigsaw\)](#) en octubre de 2010. Para aquellos de ustedes que no están al tanto de Jigsaw, es una incubadora de tecnología creada por Google con el mantra de que está utilizando sus capacidades para construir "herramientas para hacer que el mundo sea más seguro".

El correo electrónico mencionado anteriormente por el Sr. Cohen al subsecretario del Departamento de Estado William Burns describe brevemente cómo Google, en asociación con Al Jazeera, estaba trabajando en una herramienta que ayudaría a Estados Unidos a rastrear el conflicto sirio, en particular, las deserciones del régimen de Assad, lo que le daría a Washington un punto de vista interno de cómo avanzaba la guerra civil.

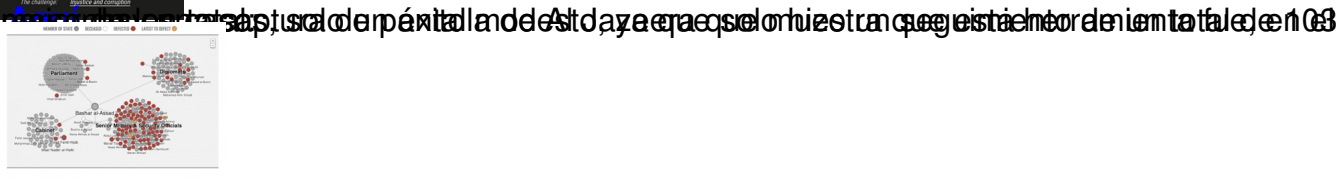

Google / Jigsaw está muy orgulloso de este logro, promocionándolo en su página web " [Projects - Made possible by Jigsaw](#) " como se muestra aquí:

Syria Defection Tracker

In the midst of the Syrian civil war, it was difficult to find reliable information about which side was winning and how the government of Bashar Al-Assad was disintegrating. We built a tool in partnership with Al Jazeera that uses social media to crowdsource information about which government officials were defecting from the Assad government and joining the opposition.

Graduated to AJ Jazeera

Google has been helping to fund the Syrian opposition since 2011, according to a report by the Washington Post. The report says that Google has been providing financial support to the Syrian opposition through a network of intermediaries. This support has been used to fund the opposition's military and political activities. The report also says that Google has been providing technical support to the opposition, including training in the use of social media and other digital tools. This support has helped the opposition to coordinate its activities and reach a wider audience. The report is based on a review of Google's internal documents, which were obtained through a Freedom of Information Act request. The documents show that Google has been providing support to the Syrian opposition since 2011, and that this support has been used to fund the opposition's military and political activities. The report also says that Google has been providing technical support to the opposition, including training in the use of social media and other digital tools. This support has helped the opposition to coordinate its activities and reach a wider audience.
